Dear executive:

"In a joint press release on November 15, 2017, Mexico's Ministry of Energy (SENER) and the National Center for Energy Control (CENACE) released preliminary results for the 3rd Long-term Power Auction. Similar to the first two auctions that were conducted in 2015 and 2016, the third Auction exhibited robust participation with 46 bidders submitting economic offers, of which 16 bids were selected. The average price of the bids for clean energy were \$20.57 USD, and may constitute one of the world's lowest prices ever achieved for a large scale clean energy auction."
